Summary:

As a frontend developer, I am passionate about creating exceptional user experiences by crafting visually stunning and functional interfaces that are both responsive and accessible. I recognize the significance of maintaining clean code for the sake of its long-term manageability, and I bring a practical and solution-oriented approach to each project to deliver high-quality results within the expected timeline.

Having managed large-scale multimedia projects in the past, I am well-versed in organization and am able to work independently while also proactively communicating to enhance collaboration and deliver maximum value to clients as part of a team. Besides B1 level proficiency in Norwegian I am fluent in English, German, Spanish, and Italian.

Relevant experience:

- 2 years of functional web design using HTML, CSS, JavaScript, Node, React, jQuery, Bootstrap, Tailwind, Git, and GitHub
- Customer relations and needs assessment / stakeholder management
- Project management for digital amusement park installations
- Experience with the benefits of agile methods
- 1 year employed as Project Manager for hardware and software development for international multimedia installations
- Management of UI design for digital music instruments control
